eVault

An integrated, All-in-One DeFi Platform

The Driver

- One of the primary challenges with Decentralized Finance (DeFi) is the need to use multiple platforms to cover the full range of DeFi Services

- This is inconvenient, often complex and confusing (especially to new web3 users), creates error-likely situations and a lack of transparency, and diminishes Return on Investment (RoI)

- These are universal barriers towards wide-spread crypto adoption that the eVault Platform overcome

The Solution

"We are proud to overcome these barriers and help promote widespread adoption. Our eVault Platform provides a fully integrated DeFi suite of utilities and serves as a comprehensive All-in-One (AIO) DeFi solution" – Aleksander, eVault Founder

- The eVault Platform integrates many different DeFi services including a staking platform, a launchpad, DEX, P2P swaps, and other utilities as we evolve

- The eVault Platform is in advanced stages of development and will go live in Q2 of 2023

Vision

- eVault believes in accessibility, ownership, and autonomy. To embody these principles, we provide a simple and intuitive All-in-One platform that gives users direct control over their specific needs

- The innovative eVault architecture places the full range of DeFi tools into one platform, working seamlessly together but also usable for standalone purposes

Roadmap

Foundation	Implementation	Platform	Expansion

Q1

- Website, Telegram, Twitter established
- Initial Marketing
- eVault Platform V1.0 Development
- $EVLT fair-launch on PancakeSwap: (2023.02.24)

Q2

- eVault Platform V1.0 Release
- $EVLT staking opens
- eVault Extended Team in Place
- Select yield optimization strategy and begin implementation

Q3

- eVault Platform V1.1 Release
- $EVLT multi-chain expansion
- Strategic partnerships in place
- Aggressive Marketing

Q4

- Service expansion
- eVault Platform V2.0 Release
- CEX Listings
- Exchange initial development
- Roadmap V2.0

Project Team

- Founded by Aleksander and joined by Kristoff and Mike, the eVault team has decades of combined experience in software development, crypto, engineering/technology, and project management/execution

Aleksander – Founder and CEO

Kris – CoFounder and COO

Mike – CoFounder and CMO
